

WAMITAB Level 4 Certificate in Facilities Management Practice

Albion Environmental

A leading UK consultancy specialising in waste management training.

Albion Environmental's aim is to provide top quality training and consultancy to the Waste and Construction Industries.

The company only uses highly qualified and experienced staff who have many years experience working within the Waste and Construction industry.

This experience is used to provide the high quality of training and services that the Waste and Construction industry requires.

Who is it for?

This qualification covers a large range of activities and is suitable for supervisory and management roles in the public and private sector, within facilities management occupations.

Can anyone do it?

There are no entry requirements for this qualification, though candidates will need to be employed in a suitable position, as it is assessed 'on-the-job'.

What does it cover and how will I learn?

Facilities Management covers activities in relation to waste, recycling, cleansing and other areas which relate to buildings and services. As such, facilities management skills will be required throughout Local Authorities, large private companies and contractors to ensure the sustainable maintenance of operating facilities. The waste sector will also require the skills to facilitate sustainable maintenance functions for the premises it operates on and within. It is assessed 'on-the-job' and learning will take place naturally as part of the normal working environment and routine.

How will I be tested?

An assessor will visit your workplace to observe your work 'on-the-job'. You will compile a 'portfolio of evidence' which will demonstrate that

you have the knowledge and competence necessary to meet the standard set in the qualification.

What next?

Candidates will be able to progress from this qualification to a number of WAMITAB qualifications in waste, cleansing and facilities management at Level 3 and 4 in order to widen and extend job roles.

Qualification Structure

In order to achieve this qualification, candidates must complete all units in the Mandatory Unit group, three units from Option Group 1 and a further three units from Option Group 2. Candidates will therefore undertake 11 units and in doing so achieve a minimum of 47 credits to complete the qualification.
